

TRAXON

Linear Go Midi White On / Off

The Traxon Linear Go Midi is a DC line powered exterior luminaire used to distinguish facades, walls, and architectural landmarks with a powerful, even color wash effect. Linear Go's high-value design features efficient electrical and optical systems, making it ideal for budget-conscious projects.

LED CHARACTERISTICS Because LEDs are semiconductor devices, their performances are subject to inherent variability commonly found in semiconductor industry. To improve consistency in performance across the same product, LED manufacturers "sort" LEDs into bins according to different preset parameters, such as forward driving voltage, illumination, etc. Whereas binning is a sorting function, it is not a correction process. Inherent variability in the manufacturing process results always in different binning distributions according to different production lots. Traxon uses automatically binned LEDs on its products, thereby minimizing output variations within the model range.

As with all electronic devices, LED output degrades over time - a term called lumen depreciation. This also explains why it is nearly impossible to expect photometric performances of two LED products with different service life spans to be the same. The rate of LED degrade is a complicate function of many factors such as operating efficiency, duration of continuous operation, and more significantly, environmental conditions (ambient temperature for example). If allowed working under optimal operating temperature range and with good ventilation, LED devices enjoy long service lives over conventional light sources. When using/installing LED devices, care should be taken to ensure that the devices will operate within the operating conditions specified in respective product literature.

Lumen measurement complies with LM-79-08 standard.
Lumen maintenance is calculated based on LM-80 compliant measurement.

Function	Wire Size	Color	Connection
DC24V+	1.0mm ²	Black	DC24V+
DC24V-	1.0mm ²	White	DC24V- & GND

Fixture daisy chain		
Voltage	Fixture Total Power Consumption *	Max Number of fixtures
24V DC (CE)	160W	e.g. 5pcs 1200mm per PSU input chain
24V DC (ETL) with Class 2 PSU	88W	e.g. 2pcs 1200mm + 3pcs 320mm per PSU input chain
Maximum number of fixtures is based on minimal interconnection lengths fixture to fixture. Actual number of fixtures is dependent on cable interconnection lengths. The number of fixtures will reduce if longer cable lengths are used. Please consult regional sales office to confirm maximums.		

* Consider some Power Supply Unit (PSU) wattage buffer for total power consumption
